

SMART INDIA HACKATHON 2025

- **Problem Statement ID – 25269**
- **Problem Statement Title- National Campaign and Digital Platform for Reducing Edible Oil Consumption.**
- **Theme- Agriculture, FoodTech & Rural Development**
- **PS Category- Software**
- **Team ID- 57219**
- **Team Name: NUCLITRON**

EatWise

Solution:

❖ Problem Resolution:

- Many households and restaurants lack awareness of excessive edible oil usage; our platform introduces **AI-driven tracking and visual analytics** to monitor consumption and promote healthier choices.
- Citizens struggle to identify healthy meal options easily; through **integration with food delivery apps**, users can **browse only verified low-oil** menu items.

❖ Unique Value Propositions (UVP):

- **Blockchain-certified** restaurants ensure **transparency** and trust between consumers, food services, and policymakers.
- Citizens join local or national **“Healthy Oil Use”** challenges with shared progress dashboards and **social recognition**.
- **AI Health Coach** gives personalized oil-reduction guidance, diet plans, and **health recommendations** linked to user data

Technology Stack:

Frontend: Flutter, Flutter Animate, VelocityX, GetWidget, FlexColorScheme.

Backend: Firebase, Node Js, Express Js, MongoDB

AI & ML: OpenAI's GPT-5, Gemini 2.5 Pro, Tensorflow, Keras.

Blockchain: Solidity, Polygon, IPFS, Web3.js, Chainlink

API Services: Cloudinary, Gmail & Twilio

❖ Feasibility:

- **Technical:** Uses scalable and secure tech stack — Flutter, Firebase, AI/ML, and Blockchain.
- **Modular:** Easily integrates with APIs like FSSAI and major food delivery apps.
- **Market:** Backed by national health programs and rising health awareness.
- **Economic:** Low initial cost with sustainable revenue through partnerships and ads.

❖ Business Potential :

- **Food Delivery App Integrations:** Earn commission or API integration fees when verified menus are displayed on platforms like Swiggy and Zomato.
- **Advertisement & Brand Partnerships:** Collaborate with healthy cooking oil brands, fitness apps, and grocers to run sponsored in-app campaigns.
- **Promotional Restaurant Partnerships:** Charge for premium placement—featured listings, banner promotions, and “healthy restaurant” highlights within the app and partner delivery platforms.

❖ Viability:

- **Multiple Revenue Streams:** Partnerships, sponsored campaigns, and institutional licensing.
- **Scalable Impact:** Targets both urban and rural areas with localized, multilingual outreach.
- **Institutional Integration:** Ready for collaboration with FSSAI, NHA, and Digital India initiatives.
- **Public Health Benefit:** Long-term measurable impact on reducing national oil consumption rates.

✓ Supporting Facts for Feasibility and Viability

- The **ICMR-NIN (2023)** recommends reducing oil intake to **12 kg/year**, while India’s current consumption is **~19.3 kg/year** — signaling major intervention need.
- **FSSAI’s Eat Right Campaign (2024)** proved that awareness programs can alter public food behavior by up to **18% in one year**.
- The Indian health tech market is projected to reach **USD 50 billion by 2030**, reflecting strong growth potential for digital wellness platforms.

Benefits:

- **AI-Powered Personalization:** The platform uses AI to analyze user data and provide **personalized low-oil meal recommendations**, nudges, and progress tracking.
- **Transparent Certification System:** Blockchain ensures **tamper-proof verification** of restaurant certifications, boosting customer trust in **low-oil claims**.
- **Citizen Empowerment:** Users gain awareness of their oil consumption and receive **real-time health insights**.
- **Behavioral Rewards:** Gamified experiences with leaderboards and reward points encourage consistent healthy choices.
- **Data-Driven Policy Support:** Real-time dashboards help policymakers monitor consumption patterns and campaign outcomes at **district/state levels**.
- **Public-Private Collaboration:** Seamlessly connects citizens, restaurants, and policymakers into **one digital ecosystem** promoting sustainable eating habits.
